

The European Fire Safety Alliance (EuroFSA) shares national knowledge and innovations on international level. We form an independent alliance of fire professionals and preventions specialists that does not support any individual fire safety product, technology or commercial organization.

EuroFSA is an authority on fire risk, based on a strong statistical evidence base. We do research, support and encourage research, studies and reports that highlight the dangers from fire in the home and support their widespread availability. We focus on sharing knowledge and we deliver strong scientific relevant consistent messages on home fire safety.

European Fire Safety Alliance

Let's make a plan on European Fire Safety. Because we care about People:

- Federation of the European Union Fire Officers Associations (FEU)
- Fire Service Academy (IFV)
- Dutch Burns Foundation
- Organisation for burns SCar Aftercare and REsearch (OSCAR)
- Antwerp Fire Service
- Flame Retardants Europe (FRE)
- Modern Building Alliance (MBA)
- Europacable
- European Aluminium
- Council of Gas Detection and Environmental Protection (COgDEM)
- European Copper Institute
- European Fire Sprinkler Network
- European Fire Safety Alliance
- European Association of Electrical Contractors (AIE)
- International Federation for the Safety of Electricity Users (Fisuel)
- European Committee of Electrical Installation Equipment Manufacturers (CECAPI)

**Let's make a plan!
on European Fire Safety**

*Because we care
about people!*

**We believe that in Europe,
most of the fire victims in
homes are preventable!**

JOIN THE EUROPEAN FIRE SAFETY WEEK 2019

We believe that most of the European fire victims in the home are preventable. Many individuals, industry and organisations from the professional fire sector are able to deliver creative, pragmatic and successful initiatives to reduce fire risk in Europe. In this first European Fire Safety Week we will meet up to share our best practices, research and your recommendations on European Fire Safety.

The European Fire Safety Week delivers research, studies and reports that highlight the dangers from fire in the home. We will deliver strong consistent best practise messages on home fire safety by respected fire professionals at national and EU level.

Let's make a plan on European Fire Safety

To reduce fires in Europe we propose, based on the findings of the European Fire Safety Week 2019, an EU action plan, based on best practices, research and your recommendations. This final document we present in March 2020 on the European Fire Safety Future meeting.

Join us to share your ideas on European Fire Safety,

Elie van Strien
Chair European Fire Safety Alliance
Evanstrien@eurofsa.org

Krzysztof Biskup
Vice Chair European Fire Safety Alliance
